

K-Love provides a very rare and valuable service to our community - it offers positive encouraging music that all members of the family can and do enjoy. This is the kind of programming that the public wants as evidenced by the fact that it is totally funded by its listeners, including me. That can't be said of most radio programming. K-Love has literally changed my life. After the death of my husband, listening to K-love brought encouragement, hope and joy again. I know many of my friends in our community would be very upset if our FM K-Love station would be displaced by an LPFM broadcaster and we would certainly do everything within our power to protest and block any such action by the FCC. Thank you for your consideration. Lisa Krausfeldt
